Summary

Data & BI professional with 5+ years of experience in SQL Server, ETL pipelines, Python, and cloud platforms. Specialized in scalable data processing, workflow optimization, data validation, and BI reporting on large datasets, with strong experience in translating business requirements into reliable, production-grade data solutions.

Technologies

SQL | Python | MS SQL | Power BI
BigQuery | SSIS | Data Warehouse | Google Cloud Platform (GCP)
ETL Pipelines | Git | Data Integration | MS Excel
Data Processing | Indexing | Stored Procedure | Query optimization
Data Validation | Performance tuning | Data Analysis

Experience

Data Engineer

12/2021 – Present

Accenture — Gurugram

- Designed and developed batch ETL pipelines using Python and BigQuery to process and transform 10M+ records daily, supporting analytics and reporting needs across business teams.
- Optimized SQL queries, SSIS packages, and data workflows, improving performance and reducing cloud compute and storage costs by 30%.
- Automated recurring data processing tasks, reducing manual effort by 80% and minimizing operational errors.
- Monitored and troubleshoot data pipelines to analyze failures, improve process flows, and enhance reliability.
- Performed data analysis and validation on 1TB+ datasets to ensure data consistency, detect anomalies, and support accurate KPI measurement.
- Collaborated with product, operations, and business teams to gather data requirements and translate them into scalable data models and pipelines.
- Built Power BI dashboards and KPI reporting solutions that empowered stakeholders to track key business metrics and facilitate data-driven decisions.
- Mentored junior team members on data handling, SQL best practices, and analytical techniques.

DevOps Engineer

12/2019 – 12/2021

Accenture — Pune

- Improved deployment pipelines for data and application systems, reducing deployment failure rates by 30%.
- Implemented monitoring solutions to ensure availability and reliability of critical data workflows and services.
- Analyzed system and user data to identify performance bottlenecks, improving query and application performance by 30%.
- Collaborated with engineering teams to design scalable systems for increasing data volumes and user load.

Education

Bachelor of Technology — Computer Science

06/2019

Maulana Abul Kalam Azad University — Durgapur

Certification

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

Valid up to 2nd April 2028
